Subject: OECD Combined Exposure Project - Document for your Review
Attachments: OECD - RA of Combined Exposures Areas 1 -3 Draft - 14 10 2016.docx

Dear OECD Combined Exposure Project team:

Thank you for your patience. On behalf of those pulling together a draft document (Canada, Australia, JRC, US and the secretariat) please find a draft of Areas 1 to 3 combined for your input and feedback. (i.e. Intro/Problem Formulation/Scoping, Hazard Considerations, Exposure Considerations).

Please send your comments to me (with concrete text suggestions wherever possible to address your comment(s)) by **18 Oct 2016**.

The document is attached here and also posted on the community website: <https://community.oecd.org/community/combined-exposures/overview>

Although Area 2 and 3 were originally going to include uncertainty considerations and some sections were drafted, it was decided those writing the sections that it will fit better in Area 4 and reduce duplication (Risk Characterisation and Capturing/Communicating Uncertainty).

For Area 4, the drafters (CAN and SWE) can now move forward. Some material, particularly on risk characterisation that was gathering for the earlier sections will instead be made of use in this Area along with the information gathering results for Area 4. The document incorporating your comments on Areas 1-3 and a draft of Area 4 will then be circulated for your review.

Please let me know if you have any questions.

Kind regards,
-Eeva
